

AMC job
{launch mozilla
get in <https://www.freerice.com>}

same

launch mozilla
move mouse to search bar
write <https://www.freerice.com/>
press enter
wait

readscreenAMC job
{clipboard = dragright mouse click from topleft to botright}
{load to clipboard}
compare s CPU work
{ clipboard compare model strings
if clipboard = ask birth - leftclickmouseAMCjob(x,y
clipboard = show ad
leftclickmouseAMCjob(xz,yt
clipboard = ask synonym
leftclickmouseAMCjob(ss,ff
}

move mouse to top left
right mouse click
drag to bot right
selected text to clipboard

do it again

another ver
b :
if screen is asking date then
{say ok}
elseif screen is like ad then
say ok
elseif screen is like wants a synonym then
break b
end if end b
now im in the english voc
read screen
get the first word
lookup first word in list
store the word next to first word in list
compare stored with next word after means: in read screen if it is the same

pick it up, if not compare with second selection if it is the same pick it up if not compare with
third selection if it is the same pick it up if not compare with fourth selection if it is the same
pick it up if not show message missing info
if confirmed wait 2 seconds and read again means go to next read screen after end b
